Review of Group Performance

The financial statements have been prepared in accordance with Singapore Financial Reporting Standards ("FRS") with modification to FRS39 Financial Instruments: Recognition and Measurement in respect of loan loss provisioning, as provided in Notice to Banks No. 612 "Credit Files, Grading and Provisioning" issued by Monetary Authority of Singapore ("MAS").

The new / revised FRS applicable to the Group with effect from 1 January 2007 are listed below. The adoption of these FRS has no significant impact on the financial statements of the Group.

- FRS1 Presentation of Financial Statements (revised)
- FRS40 Investment Property
- FRS107 Financial Instruments: Disclosures

Other than the above changes, the accounting policies and computation methods adopted in the financial statements for the first half of 2007 are the same as those adopted in the audited financial statements for the financial year ended 31 December 2006.

In the second quarter of 2006, the Group recorded a one-time gain of \$689 million, comprising special dividend received from Overseas Union Enterprise Limited ("OUE") and gain from divestment of OUE and Hotel Negara Limited ("HNL"). The following commentary excludes the effects of this one-time gain.

Results

1st Half 2007 ("1H07") versus 1st Half 2006 ("1H06")

The Group's net profit after tax ("NPAT") was \$1,103 million in 1H07, an increase of 25.0% from \$882 million recorded in 1H06. The growth was mainly attributed to higher non-interest income and net interest income, partially offset by higher operating expenses and impairment charges.

Total operating income rose 25.5% to \$2,490 million for 1H07 from \$1,984 million in 1H06. The increase was driven by higher net interest income from expanded loan volume, higher fee and commission income across all business activities, as well as higher net gain from foreign exchange, securities and derivatives.

Total operating expenses increased 19.7% to \$976 million in 1H07. Staff costs increased 25.4% to \$513 million largely due to a higher headcount. Other operating expenses rose 14.0% to \$463 million mainly on commission and brokerage, business promotions and IT enhancement and maintenance. Expense-to-income ratio of the Group improved to 39.2% in 1H07 from 41.1% in 1H06.

Impairment charges increased 86.0% to \$168 million in 1H07, largely on a long-term investment and loans.

Share of pre-tax profit of associates grew 58.4% to \$112 million, attributed mainly to higher contributions from major associates.

Review of Group Performance (cont'd)

2nd Quarter 2007 ("2Q07") versus 1st Quarter 2007 ("1Q07")

NPAT of \$585 million in 2Q07 was 12.8% higher than the \$518 million recorded in 1Q07. The increase was mainly due to higher non-interest income, partially negated by higher operating expenses.

Total operating income increased 8.7% to \$1,297 million. The increase was contributed by non-interest income which grew 24.1% to \$536 million as a result of higher fee and commission and dividend income.

Total operating expenses increased 6.8% to \$504 million, mainly due to higher staff costs on higher bonus accruals. Expense-to-income ratio improved to 38.9% in 2Q07 from 39.5% in 1Q07.

Impairment charges declined 7.4% to \$81 million largely from loans, partly offset by impairment charge on a long-term investment.

Pre-tax profit from associates was \$65 million, representing an increase of 38.8% over 1Q07.

2nd Quarter 2007 ("2Q07") versus 2nd Quarter 2006 ("2Q06")

The Group's NPAT increased 32.0% to \$585 million in 2Q07 from \$443 million in 2Q06. The increase was contributed by higher non-interest income and net interest income, partly offset by higher operating expenses and impairment charges.

Total operating income rose 32.2% to \$1,297 million. Net interest income grew 13.4% to \$761 million, largely from customer loans. Non-interest income increased 72.7% to \$536 million, mainly due to higher fee and commission income and net gain from foreign exchange, securities and derivatives.

Total operating expenses increased 20.3% to \$504 million. Staff costs rose 28.6% to \$272 million, primarily on increased headcount while other operating expenses increased 12.0% to \$232 million. Expense-to-income ratio improved to 38.9% in 2Q07 from 42.7% in 2Q06.

Impairment charges increased 128.2% to \$81 million largely due to impairment charge on a long-term investment.

Share of pre-tax profit of associates rose 61.2% to \$65 million due to higher profit recorded by major associates.

Net Interest Income

Net interest income of the Group increased 15.0% over 1H06 to \$1,523 million in 1H07. The increase was mainly from loans on account of higher volume and improved margin. Net interest margin improved 9 basis points over 1H06 to 2.10% in 1H07, driven by higher customer loan margin.

Against 1Q07, the increase in net interest income from loans and securities in 2Q07 were negated by lower contributions from inter-bank money market activities. The lower interest margin was attributed to inter-bank money market activities in 2Q07, coupled with substantial interest recovery on non-performing loans in 1Q07.

Compared with 2Q06, net interest income grew 13.4% to \$761 million in 2Q07. The increase was largely driven by higher loan volume. Net interest margin rose 7 basis points from 1.97% in 2Q06 to 2.04% in 2Q07.

The growth was largely driven by higher fee and commission income across all business activities, and higher net gain from foreign exchange, securities and derivatives. The Group's non-interest income in 1H07 accounted for 38.9% of total income.

Compared to 1Q07, non-interest income grew 24.1% to \$536 million. The increase was from fee and commission income, largely on fund management, investment and trade-related activities, and higher dividend income.

Non-interest income in 2Q07 increased 72.7% from \$310 million in 2Q06. The increase was attributed to higher fee and commission income from all business activities and higher net gain from foreign exchange, securities and derivatives.

Business Segments

The Group's businesses are organised into four segments based on the types of products and services that it provides. These segments are Personal Financial Services, Institutional Financial Services, Global Markets and Investment Management and Other.

Personal Financial Services

Personal Financial Services ("PFS") segment covers Consumer, Privilege and Private Banking. Consumer Banking serves the mass individual customers with a wide range of products and services, including deposits, loans, investments, credit and debit cards and life assurance products. Privilege Banking provides an extended range of financial services, including wealth management, offshore and restricted products such as structured notes, funds of hedge funds, and high networth insurance plans to the wealthy and affluent customers. For the accredited investors and high networth individuals, Private Banking provides an elevated level of personal services and consultation.

The increase in segment profit of 41.1% to \$422 million in 1H07 was mainly due to higher income from credit card operations and higher profit from sale of investment products, stronger net interest income from loan growth and lower impairment charges. These were partially offset by higher operating expenses.

Institutional Financial Services

Institutional Financial Services ("IFS") segment encompasses Commercial Banking, Corporate Banking, Corporate Finance and Capital Markets. Commercial Banking serves the small and medium-sized enterprises. Corporate Banking serves large local corporations, government-linked companies and agencies, including non-bank financial institutions. Both Commercial Banking and Corporate Banking provide customers with a broad range of products and services that include current accounts, deposits, lending, asset finance, trade finance, structured finance, cash management and cross-border payments. Corporate Finance serves corporations with services that include lead managing and underwriting equity offerings and providing corporate advisory services. Capital Markets specialises in providing solution-based structures to meet clients' financing requirements in the area of structuring, underwriting and arranging syndicated loans, project finance and structured finance, and underwriting and lead managing bond issues.

Segment profit showed a growth of 19.7% to \$644 million in 1H07. The increase was largely due to higher net interest income on expanded loan portfolio from both Singapore and overseas operations, as well as interest recoveries and higher gain from sale of foreclosed securities. These were partially offset by higher operating expenses and lower write-back of impairment charges on loans.

Global Markets and Investment Management

Global Markets and Investment Management ("GMIM") segment provides a comprehensive range of treasury products and services, including foreign exchange, money market, fixed income, derivatives, margin trading, futures broking, gold products, as well as an array of structured products. It is a dominant player in Singapore dollar treasury instruments as well as a provider of banknote services in the region. It also engages in asset management, venture capital management, and proprietary investment activities.

GMIM's profit grew 34.4% to \$254 million in 1H07. The improved performance was primarily attributed to higher gains from interest rate management, equity trading and structuring activities, as well as higher investment income, asset management fees and performance fees.

Other

Other segment includes property-related activities, insurance businesses and the management of capital funds. The segment recorded a lower profit of \$81 million in 1H07 compared to \$85 million in 1H06. This was primarily due to impairment charge on a long-term investment and lower gain from capital funds, partially offset by higher gain from property-related activities and lower operating expenses.

Note: "Profit" in the above analysis refers to "Segment profit before amortisation of intangible assets".

Capital Adequacy Ratios

The Group's tier 1 CAR and total CAR as at 30 June 2007 were 4.8% points and 5.7% points above the minimum 6% and 10% required by MAS respectively.

The lower CARs over the comparative periods were mainly attributed to higher risk-weighted assets from expanded loan and investment portfolios, partly negated by higher retained profit.
